## 3DSKY PRO 3D Models Collection

**DOWNLOAD:** <https://tinurli.com/2itl9g>

---

work with a couple of problems I'm having here. First off is that none of the characters will load the first time they load into the game. They load fine but it doesn't seem to recognize them or something. Now whenever I enter the character screen I have to enter the character's name then everything else works fine, including the load. Is there something I'm doing wrong? I've tried adjusting the range of the Collision box and everything else I can think of and nothing works. Another thing is that none of my models load into the game the first time. They load fine but for some reason they're just not being drawn on the screen. I've tried adjusting the Collision box and everything else I can think of and nothing works. I know there's a bunch of mods for this game out there but none of them work for me. I'm using True3dsky pro 3d models. I'll be working on the "EarthBound" release now. It's already 90% done, but I'll be finishing it off over the next two weeks. It's mostly done with the sprites (save for some placeholder art for links), the background, and the music (and I might make a very rough version of the score, but I haven't decided yet). I just need to do all the animation and bug testing. I'm hoping to have the game up by the end of the month. After this weekend's update, there is a new collection update, with new models. This version also includes a new language pack, and a small change with the animations. More details in the download description. I'm working on finishing up the "EarthBound" collection, and will be uploading it to Moddb soon. I don't have a date yet, but I'm hoping for a beta release sometime this week. I'm currently waiting on the final designs for the "EarthBound" collection. I've been working on the sprites/animations (and the later, most features), but the majority of the game isn't done yet. The load screens and title screen are the next big things I need to finish. Also, I'm working on a new language pack, but I won't be finished until next week. I'm working on the "EarthBound" collection now. It's mostly done, but I'm in the process of tweaking it and fixing bugs. There are a couple things still being done.

The load screens and title screen are the next big things 82157476af
