Certainly has a lot of potential, at the moment only about an hour or two of content could be squeezed out of it but it would add a lot of replay value if there was a point system that allowed you to get better weapons and upgrade your character with buff and abilities, definitely worth the money. Really wanted to like this game, graphics are good, but the physics in this game is terrible, the only liberty you get from this game is exiting. There is not much of a game right now, there are waves of orc zombies who attack you and even though they are wearing armor? has no affect on game play. Reloading in this game is unnecessarily complicated, and guns are not even effective. Hopeful that this game will have a campagin soon, as of now its just the worst wave shooter out.. could not make a more dull game. Oh and don't drop your weapon... or its gone forever
